

SKAVEN SWARM

SKAVEN

Due to a Warpstone shower Skaven are pouring into every realm in search of the precious shards, hoping to gain favor with their mighty Vermin Lord and overthrow the Top-worlders once and for all. This plague of vermin will not be tolerated and has now had a price put on its millions of heads.

A Price on their heads:

For every Skaven (*any kind*) that you kill you will be rewarded with One Gold coin for every two Strength or Craft (*rounded down*) that they have.

You will still keep the cards in order to keep track of your Experience points.

You Can not use the Skaven Character for this game.

WARPSTONE

Warpstone Shards have been scattered across the realms, you will need to find as many as you can in order to get through the Vally of Fire and defeat the Vermin Lord.

Warpstone Shards:

Warpstone Shards are small and as such do not take up any space in your Objects stack.

You can carry as many Warpstone Shards as you can find regardless of their bonuses.

A Warpstone Shard can **Never** be discarded.

All other effects count, however if you are told to discard a Shard it will be dropped into the space the character is on.
