

Fear the Reaper

Ironclaw

August 14, 2011

1 Introduction

A month or so ago I was creating several Reaper inspired cards for Talisman. This is my first sort of mini expansion. My goal is to create some cards that truly make the Reaper more of a force on the board. Certain cards can be drawn that will make the Reaper even more active. You might think you safe across the board from him, but any of these cards can make it where you might face death the next turn.

I used the word "Ruin" alot on these cards. It is used in place of saying death-this or reaper-that. Plus, as I continued I realized that I could use it as a mechanic on other cards and gave the "Ruin Ring" a way to ignore the effects of the Rod of Ruin.

Hopefully, the will be fun to try out for people. I use Jon's from Talismanslands fabulous templates. I had an extra upgrade kit, so I have been printing these cards out on sticker paper and using putting them on the extra cards that I have. They work out nicely that way in the deck.
